Of course, should you have any questions or concerns, please feel free to contact us at 1-800-874-7644 or email [info@FYItesting.com](mailto:info@FYItesting.com)

Sincerely,  
Business Services  
FYI Testing, LLC

# ALCOHOL TESTING SOLUTIONS

Integrity, Experience, Innovation

The National Highway Traffic Safety Administration reports that **alcohol is the single largest cause of fatal crashes.**<sup>1</sup> Alcohol-related fatalities accounted for 40 percent of all highway fatalities in 2001.<sup>1</sup>

## Alcohol and drug abuse

costs the American economy an estimated \$276 billion per year in lost productivity, health care expenditures, crime, motor vehicle crashes, and other conditions.<sup>2</sup>

LabCorp's Occupational Testing Services offers instant saliva alcohol testing at many of its more than 1000 patient service centers (PSCs) nationwide. The instant saliva alcohol test is performed on-site by trained professionals to obtain an immediate result. The saliva alcohol test used by LabCorp conforms to the Department of Transportation (DOT) model specifications for screening devices that measure alcohol in bodily fluids.<sup>3</sup> In the event that a positive screen is obtained with the instant test, a DOT required breath alcohol confirmation can be performed at one of LabCorp's Substance Abuse Collection Professional Network (SACPN) locations.

LabCorp can customize a saliva alcohol testing program to meet your postaccident, random, or preemployment testing needs. In addition to saliva alcohol testing, LabCorp offers laboratory-based blood alcohol testing for nonfederally regulated programs. The same LabCorp PSC network that conducts saliva alcohol screening may also be used for blood alcohol testing.

# ORAL FLUID DRUGS OF ABUSE TESTING

Integrity, Experience, Innovation

Lab-based **oral fluid drug testing** provides a simple method to collect chain-of-custody drug screen specimens almost anywhere.

## Make confident employment decisions

with our proven workplace drug testing expertise and a superior, easy-to-use oral fluid collection device. LabCorp, along with its specialty laboratory MedTox, offers an expanded oral fluid drug testing program.

## The LabCorp Advantage

- Sample collection without stimulation that may reduce drug concentration(s) and potentially affect their detection.<sup>1</sup>
- Adequate, known sample volume collection of 1 mL, as indicated by the device's blue window, is important to assure sufficient specimen for confirmation or retesting, if needed.
- Extensive internal quality control program and participation in two nationally recognized oral fluid proficiency testing programs (Research Triangle Institute and College of American Pathologists).
- Oral fluid collection device that provides excellent drug recovery, including for marijuana.<sup>2</sup> Marijuana is the most frequently abused illegal drug in the workplace.<sup>3</sup>

Our oral fluid drug test program offers the following drug classes:

- Amphetamine/methamphetamine/ecstasy
- Barbiturates
- Benzodiazepines
- Cannabinoids (THC)
- Cocaine
- Ethyl Alcohol
- Methadone
- Opiates (expanded menu)
- Phencyclidine (PCP)
- Propoxyphene

We perform the initial screening test by enzyme-linked immunosorbent assay (ELISA) microplate technology and offer confirmation of presumptive positive screens using chromatography/mass spectrometry methodology (GC/MS\* or LC/MS/MS\*\*).

# DRUG-FREE WORKPLACE TESTING

Integrity, Experience, Innovation

**Transform your non-regulated drug-free workplace testing programs** with LabCorp's electronic, Web-based chain-of-custody process (LabCorp Web COC) and rapid drug screening program.

## LabCorp Rapid Drug Screening\*

LabCorp's rapid drug screening combined with Web COC may help to increase productivity by reducing time to hire. LabCorp also offers laboratory-based drug testing options for regulated programs and employers who prefer testing performed in the laboratory.

- **Multiple drug screen panel options**
  - 5 drug panel
  - 5 drug panel with specimen validity testing
  - 10 drug panel
- **Digital chain-of-custody for non-regulated testing**
  - LabCorp's Web COC application leads the collector through the entire process to produce complete documentation.
- **Collections in more than 1,000 LabCorp-owned and operated facilities**
  - Web COC collection site locations available online through the LabCorp Solutions Web Tools or [www.LabCorpSolutions.com](http://www.LabCorpSolutions.com)
- **"Non-negative" specimens shipped to laboratory in specimen vial**
- **GC/MS<sup>1</sup> confirmation testing for positive screens at LabCorp-owned and operated SAMHSA<sup>2</sup>-certified laboratories**
  - LabCorp senior scientists available for technical consultation
- **Real-time "no show" notification in a client's specified time frame**
  - Online Donor Registration allows employers to define the testing time frame with an expiration date and time.
  - E-mail notification available to indicate collection completion or if the candidate was a "no show"
- **Real-time status at each stage of the testing process**
  - Online status including pending donor registration, collection completion, laboratory confirmation testing status (if applicable), and result reported
- **Web-based remote hiring solution**
  - E-mail notification to donor that includes unique donor registration number for expedited processing at the collection facility

## LabCorp Laboratory-based Drug Screening

- **Digital chain-of-custody for non-regulated urine, hair, oral fluid, and blood drug testing**
  - LabCorp's Web COC application leads the collector through the entire process to produce complete documentation.
- **Collections in more than 1,000 LabCorp-owned and operated facilities**
  - LabCorp specimen collection locations and driving directions available online at [www.LabCorpSolutions.com](http://www.LabCorpSolutions.com)
- **Additional collections coverage in more than 6,000 contracted third-party facilities**
- **Split specimen collection available**
- **Real-time "no show" notification in a client's specified time frame**
  - Online Donor Registration allows employers to define the testing time frame with an expiration date and time.
- **Real-time status at each stage of the process**
  - Online status including pending donor registration, collection completion, testing status, and result reported

- **Web-based remote hiring solution**
  - E-mail notification to donor that includes unique donor registration number for expedited processing at the collection facility
- **Web-based specimen status and chain-of-custody image viewing for non-regulated and regulated testing**
  - Only the designated MRO<sup>3</sup> may view regulated chain-of-custody images
- **SAMHSA-certified laboratories**
  - LabCorp senior scientists available for technical consultation
- **Paper chain-of-custody for regulated testing**

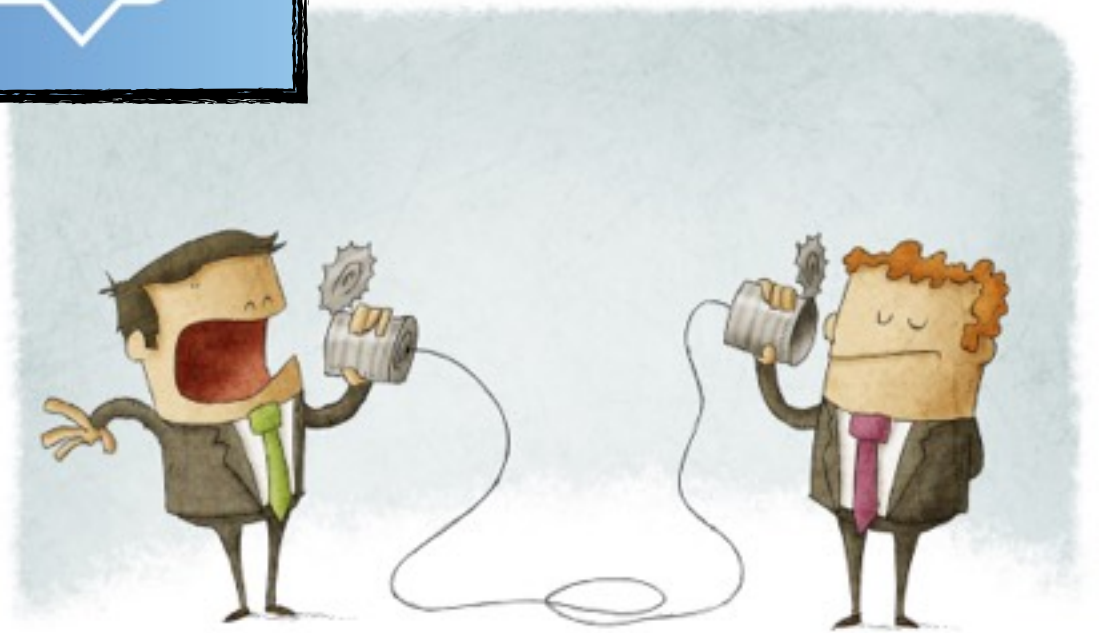

\* For non-regulated drug testing where state law allows. Laboratory-based drug testing is available for regulated programs.

1. Gas chromatography/mass spectrometry
2. Substance Abuse and Mental Health Services Administration
3. Medical Review Officer

## FYI Testing Price

- 5 drug panel \$65 ~~—~~ \$45
- 5 drug panel with specimen validity testing \$75 ~~—~~ \$45
  
- 10 drug panel \$85 ~~—~~ \$52
